Work Experience

University of Wisconsin-Milwaukee / February 2019 – Present
Front End Developer & Office Operations

- Updated iServiceDesk website (maintenance management software portal for UWM's Facility Services) – worked on 200+ HTML/CSS files
- Created & maintain several UWM WordPress websites
- Using CMMS software (TMA): equipment & materials inventory, labor & project tracking, data querying, data manipulation within Excel

Projects

React Portfolio

- Built a professional portfolio using Node.js, Express.js, MongoDB, and React

Social Network API

- Used Express.js, MongoDB, and Mongoose to build a REST API for a social networking app; created & tested CRUD routes

Work It Done

- Worked with a team to build a full stack project management app, using Node.js, MySQL, Express.js, and Handlebars

E-Commerce App

- Used Node.js, Express.js, MySQL, and Sequelize to build an e-commerce backend; created models & associations, seeded, and queried SQL database; created and tested CRUD routes, using Insomnia

Employee Tracker App

- Created tables, seeded, and queried SQL database to support an app companies can use to track employee data
